

DUALCOM PLUS

by CYBER@SWITCHING®

All products made in the USA

Remote Management

Cyber Switching's Dualcom PLUS intelligent Power Distribution Unit (iPDU) offers a robust and fully featured solution for remote power monitoring and control. Stay in touch with IT equipment conveniently 24 hours a day, 7 days a week.

Manage Systems Better

The Dualcom PLUS provides a new approach to managing systems. Save energy by scheduling shutdown periods. Monitor current consumption to utilize valuable rack space efficiently.

Power Control and Monitoring No Matter the Location

The Dualcom PLUS enables scheduled or manual on/off control of each outlet and monitoring of the load on each outlet. Two interfaces provide convenient access to your system— TCP/IP and Serial Port.

Features:

Easy to read LED meter

- Total system current displayed on seven-segment LED
- True RMS current measurement

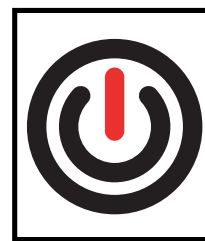

LED outlet status indicators

- Real-time outlet status shown with color
- Green = normal, Red = tripped

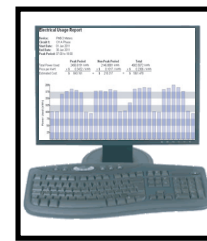

Outlet Current Metering and Control

- Track power usage and reduce costs
- Control and monitoring for each outlet

Cyber Breaker®

- "Trips" an individual outlet when the amperage exceeds a user-defined threshold
- Limits overcurrent conditions to a single outlet, protecting equipment and avoiding the shutdown of other devices on the same bank

Supports Enterprise Management Console (EMC)

- Auto-discover, manage and monitor all Cyber Switching network-ready products from one centralized interface
- Free EMC software at www.cyberswitching.com
