www.cyberswitching.com

Cyber Switching's EV charger, the CSE3, draws upon the company's three decades of success in delivering advanced power management technology solutions to major commercial customers around the world. Cyber Switching holds 42 patents across its line of power distribution units, sub-metering systems and other products. The company has worked with leading firms such as Adobe, HP, Cisco, JLL, Foxconn, CBRE, and PG&E. With the CSE3, it offers a Level 2 smart EV charger that is designed to be installed at either commercial or residential host sites. This single integrated solution has multiple features that make it reliable, easy to use and cost-effective.

KEY FEATURES

- Provides up to 80A to charging capacity
- OCPP-Compliant Solution
- UL-certified with Type 3 enclosure rated for Indoor and outdoor installation
- Water- and dust-resistant
- Wall and pedestal mounting options
- Lets you accept payments for the usage
- Lets you schedule and reserve charging
- Easy to Use
- Quickest EV Charger to Install
- High quality manufacturing
- High reliability with 96.8% uptime
- Rated for high and low temperature operating conditions
- 18 foot-long charging cable
- 3-year warranty

PEDESTALS

CS-SP (Single or Dual mount)

CS-DRP

Voltage	208-240 VAC
Power/Amperage	3.5kW/16A, 7kW/32A, 10kW/40A, 11.5kW/48A 13.5kW/56A 15.4kW/64A 19kW/80A
Frequency	50-60 Hz
User Authentication	RFID
Network	LAN, WiFi, 4G
Connectivity	OCPP 1.6J
Cable Length	18 ft
Screen	4.3" LCD screen

Certificates	ETL, Energy Star
Charging Interface	SAE J1772, Type 1
Safety Compliance	UL2594, UL2231-1-2
RCD	CCID20
Multiple Protection	UVP, OVP, RCD, SPD, OCP, OTP, CFPF, Ground Fault Protection
Operating Temperature	-22°F to 122°F
Indoor/Outdoor	IK08, Type 3 Enclosure
Weight	20 lbs

WHY CYBERSWITCHING CSE3?

Monitoring & Connectivity: Thanks to its Wi-Fi, 4G and LAN connection capabilities the CSE3 is equipped with a complete energy monitoring solution that can be accessed remotely via a mobile app: real-time analytics; monthly reports on performance; load management and remote management of EV charging stations in multiple locations.

Reliability: Cyber Switching's rigorous process for engineering design and manufacturing has resulted in an EV charger built to perform for many years at one of the highest reliability rates in the market with an up to 96.8% uptime rate.

**THANK YOU, AND WE
LOOK FORWARD TO
WORKING WITH YOU!**
